

QualiProtec® Cleaner N Neutral Cleaner for coated Surfaces

Product Description

Qualiprotec Cleaner N has been developed specifically for the QualiProtec Façade Renovation System for neutral cleaning of coated surfaces.

Mild cleaning product specially developed for cleaning coated surfaces, metallic façades coated with powder and paint, doors, synthetic materials, aluminium, high-grade steel, glass and window frames. QualiProtec Cleaner N quickly loosens grease, nicotine and dirt deposits.

Apart from cleaning components, QualiProtec Cleaner N also contains components with protective qualities which help to retain the shine of coated surfaces, even with constant use.

Application

Rinse surfaces with clean water to remove loose particles of dirt which could possibly cause damage.

Apply QualiProtec Cleaner N on dry or wet surfaces using a sponge or special washer and leave on for a short time to take effect. A mechanical rubdown with a cloth or white façade pad will increase the cleaning effect.

For subsequent coating, it is essential that the surface is even and free of all substances such as grease, oil, etc. To this end, the surface should be cleaned with QualiProtec Abrasiv B before coating (see Technical Data Sheet).

Afterwards rinse thoroughly with clean water to remove all residues of the cleaner. Where there is very hard water, it is recommended that demineralized water is used, since calcium residue, trickles and outflow can remain visible when clear coating is applied.

Polish surfaces with a chamois leather cloth, paying particular attention to the edges and ensuring that there are no drips which – when clear coating is applied – would compromise the overall effect.

If the surface is not free of dirt and chalking after cleaning, it can be reworked with QualiProtec Cleaner A (see Technical Data Sheet).

Do not apply at temperatures below 10 °C, on warm surfaces, or in the blazing sun.

Special Notes

The information contained in this technical data sheet is based on general technical standards and is meant for specialists. Any changes in the recommended operating procedures or specified environmental conditions may significantly influence the results. Our guarantee covers only the quality of the material delivered. We do not undertake any responsibility for the application. In case of doubt, we recommend contacting our Technical Service. Our products are under constant development. Therefore please note date of issue of our technical data sheet and ask for latest edition.

Safety Measures

Avoid contact with skin and eyes, and observe the application and safety measures of the Safety Data Sheet.

Technical Data

Color	Pale blue
Contents	Watery solution of anionic/non-ionic tensides and pyrophosphate
pH-Value	Neutral
Packaging	Containers of 10 lt.
Thinning	1 : 5 to 1 : 10 with water depending on degree of soiling
Yield	ca. 15 m ² /lt. (depending on degree of soiling)
Shelf life	2 years in closed container. Protect from frost.
Waste disposal	QualiProtec Cleaner N is biodegradable and waste water friendly. However the local waste water regulations must always be observed.

	QualiProtec Cleaner N
Flash point	N/A
UN No.	N/A
Danger class RID/ADR	N/A
VOC value	VOC-free
