

QualiProtec® Cleaner NE Neutral Cleaner for Eloxal

Product Description

Qualiprotec Cleaner NE has been developed specifically for the QualiProtec Façade Renovation System. This cleaner is indicated for light soiling of anodized surfaces or after cleaning of anodized surfaces with QualiProtec Abrasiv E.

Qualiprotec Cleaner NE is a neutral, special cleaner for anodized façades and other building components of anodized aluminium. It contains cleaning components with excellent dirt-dissolving qualities. Apart from effective cleaning, QualiProtec Cleaner NE has no negative effect on Eloxal and aluminium.

Application

Rinse surfaces with clean water to remove loose particles of dirt which could possibly cause damage.

Surfaces cleaned with QualiProtec Abrasiv E must then be thoroughly washed with QualiProtec Cleaner NE. QualiProtec Abrasiv E contains terpene which, if not carefully washed off, can lead to impaired adhesion of subsequent coating.

Apply QualiProtec Cleaner NE on dry or wet surfaces using a sponge or special washer and leave for a short time to take effect. A mechanical rubdown with a cloth or white (or red) façade pad with increase the cleaning effect.

Then wash off thoroughly with **plenty of** clean water to remove all residues of the cleaner. Where there is very hard water, it is recommended that demineralized water is used, since calcium residue, trickles and outflow can remain visible when clear coating is applied.

Polish surfaces with a chamois leather cloth, paying particular attention to the edges and ensuring that there are no drips which – when clear coating is applied – would compromise the overall effect.

Do not apply at temperatures below 10 °C, on warm surfaces, or in the blazing sun.

Special Notes

The information contained in this technical data sheet is based on general technical standards and is meant for specialists. Any changes in the recommended operating procedures or specified environmental conditions may significantly influence the results. Our guarantee covers only the quality of the material delivered. We do not undertake any responsibility for the application. In case of doubt, we recommend contacting our Technical Service. Our products are under constant development. Therefore please note date of issue of our technical data sheet and ask for latest edition.

Safety Measures

Avoid contact with skin and eyes and observe the application and safety measures of the Safety Data Sheet.

Technical Data

Color	Light red
Contents	Watery solution of anionic/non-ionic tensides and pyrophosphate
pH-Value	Neutral
Packaging	Containers of 10 lt.
Thinning	1 : 5 to 1 : 10 with water (depending on degree of soiling)
Yield	ca. 20 m ² /lt. (depending on degree of soiling)
Shelf life	2 years in closed containers. Protect from frost.
Waste disposal	Qualiprotec Cleaner NE is biodegradable and waste water friendly. However, the local waste water regulations must always be observed.

	Qualiprotec Cleaner NE
Flash point	N/A
UN No.	N/A
Danger class RID/ADR	N/A
VOC value	VOC-free
